## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, a body member, at least one terminal, a three positional wiring mechanism, a wiring post element, a speed wire mechanism recited in claim 1 must be shown or the feature(s) canceled from the claim(s). The examiner suggest showing reference number for a body member, at least one terminal, a three positional wiring mechanism, a wiring post element, a speed wire mechanism. A proposed drawing correction or corrected drawings are required in reply to the office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. No new matter should be entered.

**Applicant is responsible for showing reference number for each claimed invention.**

**Note: use claim 1, as guide line to provide reference number for a body member, at least one terminal, a three positional wiring mechanism. The inventor should review the remaining claims and provide reference number for each claimed invention.**

2. Applicant is required to submit a proposed drawing correction in reply to this office action. However, formal correction of the noted defect may be deferred until after the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

### ***Specification***

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

Claims 2-19 are not adequately supported by the specification.

NOTE: the examiner assumed that claims 3-19 are depend from claim 2, since claim 1 being canceled.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 2-19 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an electrical wiring device, the specification does not reasonably provide enablement for a body member ..... and a speed wire method wiring position (for claim 2 lines 3-11). The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or assemble the invention commensurate in scope with the claims.

Art Unit: 2831

The specification doesn't reasonably disclose the claimed subject matter of claim 2, and therefore the subject matter of claim 2 is not enabled by the disclosure of the invention. The applicant is required to cancel the claim 2 or provide a reasonable explanation of why they feel the specification supports the subject matter as disclosed in claim that includes **page number with lines number in the original disclosure and providing element number for each claimed invention.**

**Please note that the claim or claims (2-19) must conform to the invention as set forth in the remainder of the specification and the terms and phrases used in the claims must find clear support or antecedent basis in the description so that the meaning of the terms in the claims may be ascertainable by reference to the description, see MPEP 608.01 (d)(1).**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 3-19 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3-19 cannot depend from claim 1 because claim 1 being canceled. the examiner assumed that claims 3-19 are depend from claim 2.

Art Unit: 2831

***Allowable Subject Matter***

6. Claims 3-19 would be allowable if rewritten to overcome the 112 second paragraph, the drawing objection and the specification objection set forth in this Office action.

7. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, the specification objection, and the drawing objection set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reasons for the indication of the allowability of claims 2-19 are the inclusion therein, in combination as currently claimed, of the limitation of the device comprising: the wiring post element and the pressure plate being configured to couple wire to the three positional wiring mechanism as claimed by the inventor.

The previously listed limitation is neither disclosed nor taught by the prior art of record, alone or in combination.

***Other prior art cited***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kerestan et al, Simmons, Eder et al, Burbine, Livingston, Roberts, and Hsiao disclose a device similar to applicant's claimed invention.
